Getting started on Course 6

Congratulations on completing Course 5 of the [Google Project Management Certificate!](#)

Head to the next optional lesson to learn more about uncovering job opportunities and create a job search project plan. Or, feel free to move to the **last** course of the certificate:

[Course 6: Capstone: Project Management in the Real World.](#)

In this course you'll create project documents based on an imagined scenario. You'll learn details through conversations, emails, and other materials, just as you would in a real world scenario.

You'll also review and practice key project management concepts, including:

- Analyzing materials to identify project requirements, solve problems, and manage stakeholders
- Negotiation techniques and influencing skills
- Listening with empathy when working with a team
- Stakeholder communication skills

You're almost there! Keep up the great work.
