

Your learning journey

In this course, you explored the history of Agile and learned about the key values and principles. You learned a lot about Scrum—including the key roles, events and artifacts—and then put many of those into practice. Let's reflect on how far you've come. Share 5–10 sentences addressing the following questions:

Are there concepts or portions of content that you would like to learn more about?

Is there anything unexpected or surprising that you have learned?

Are there some responsibilities associated with the role of a project manager that appeal to you more than others?
