# Your learning journey

Now that you've completed **Course 3: Project Planning: Putting it All Together**, let's look back on the project planning phase where you learned to communicate throughout the planning process.

Think back to a recent project you were involved in, and answer the following questions:

Did everyone on the team share in all the project communications throughout the project?

What was available and what was not available?

Now that you have learned more about effective ways to communicate during a project, how might you improve communication in your next project?

Your response should be 5–10 sentences long, and might discuss:

Meetings

Emails

Phone calls

Written documents

Formal presentations
